

Kaige Tan

Körsbärsvägen 9, 114 23 Stockholm, Sweden

kaiget@kth.se / edwin_tan@outlook.com

+46 727408607

Education

- Ph.D student Royal Institute of Technology, Stockholm, Sweden *Dec, 2020 - Present*
- M.Sc. Royal Institute of Technology, Stockholm, Sweden *Sept, 2017- Sept, 2019*
Major: Engineering design, Track: Mechatronics
- B.Sc. Harbin Institute of Technology, Harbin, P. R. China *Sept, 2014- June, 2017*
Major: Mechatronics

Research Interests

- Convex optimization
- Reinforcement learning
- Optimal control
- Optimal filtering

Journal Publications

- **Tan, K.**, Ji, Q., Feng, L., & Törngren, M. (2023). Edge-enabled Adaptive Shape Estimation of 3D Printed Soft Actuators with Gaussian Processes and Unscented Kalman Filters. *IEEE Transactions on Industrial Electronics* (early access).
- Liu, T., **Tan, K.**, Zhu, W., & Feng, L. (2023). Computationally Efficient Energy Management for a Parallel Hybrid Electric Vehicle Using Adaptive Dynamic Programming. *IEEE Transactions on Intelligent Vehicles* (early access).
- Yang, J., **Tan, K.**, Feng, L., & Li, Z. (2023). A model-based deep reinforcement learning approach to the nonblocking coordination of modular supervisors of discrete event systems. *Information Sciences*, 630, 305-321.
- **Tan, K.**, Feng, L., Dán, G., & Törngren, M. (2022). Decentralized Convex Optimization for Joint Task Offloading and Resource Allocation of Vehicular Edge Computing Systems. *IEEE Transactions on Vehicular Technology*, 71(12), 13226-13241.

deep learning. *Applied Sciences*, 9(7), 1375.

Conference Publications

- Liu, T., **Tan, K.**, Zhu, W., & Feng, L. (2023). Optimal and Adaptive Engine Switch Control for a Parallel HybridElectric Vehicle Using a Computationally Efficient Actor-Critic Method. Accepted in *2023 IEEE/ASME International Conference on Advanced Intelligent Mechatronics (AIM)*.
- Liu, T., Zhu, W., **Tan, K.**, Liu, M., & Feng, L. (2022, August). A Low-Complexity and High-Performance Energy Management Strategy of a Hybrid Electric Vehicle by Model Approximation. In *2022 IEEE 18th International Conference on Automation Science and Engineering (CASE)* (pp. 455-462). IEEE.
- Song, Q., **Tan, K.**, Runeson, P., & Persson, S. (2021, August). An Industrial Workbench for Test Scenario Identification for Autonomous Driving Software. In *2021 IEEE International Conference on Artificial Intelligence Testing (AITest)* (pp. 81-82). IEEE.

Work Experience

- MIL system engineer at BOSCH Group *August, 2019 – Sept, 2020*
Worked at ETAS department in BOSCH Group as a model-in-the-loop engineer, develop and validate model of fuel cell control unit (FCCU) in Simulink and carry out open loop and closed loop test for controller.
- VESC program at Volvo Cars *June, 2018 – July, 2019*
Worked at Volvo Cars Active Safety CAE team for the summer internship and master thesis project. The project investigated a method about how to build a test database for an Autonomous Driving (AD) function on a virtual platform and how to extract critical scenarios from the test database to finish test cases reduction through optimization. The virtual platform under study is the model-in-the-loop (MIL) based Simulation Platform Active Safety (SPAS) environment.

Honors

- The First Prize in China Undergraduate Mathematical Contest in Modeling (CUMCM), Heilongjiang Province Division *2016.09*
- The Third Prize in Shenzhen Cup of Mathematical Contest in Modeling, China *2016.05*
- Meritorious Winner in Mathematical Contest In Modeling (MCM/ICM), America *2016.02*
- Excellent Undergraduate Scholarship *2014-2015*
